## LIFE OF ANIMALS

2.1

Show the way for the animals / insects to join their group.

Read the paragraph under the title, *Group behaviour of animals* given in Page No: 77  
and the paragraph under the title, *Group behaviour of animals* given in Page No: 77  
the *table* given in Page No. 80 of the textbook and write the answer for the following  
questions.

What is known as group behaviour?

Animals spending time together with other  
members of same species called group behaviour.

How do honeybees share their work?

The queen bee lays eggs, worker bee  
collects honey, the work of drone bee is to  
mate with a queen bee.

What are the benefits that the elephants get by living in groups?

Read the paragraph under the title, *Group behaviour of animals* given in Page No: 77 and the *table* given in Page No. 80 of the textbook and write the answer for the following questions.

What is known as group behaviour?

Animals spending time together with other members of same species called group behaviour.

How do honeybees share their work?

The queen bee lays eggs, worker bee collects honey, the work of drone bee is to mate with a queen bee.

What are the benefits that the elephants get by living in groups?

Match the following birds with their adaptations.

2.7

Write the special senses in the following animals.

Producing ultrasonic sound

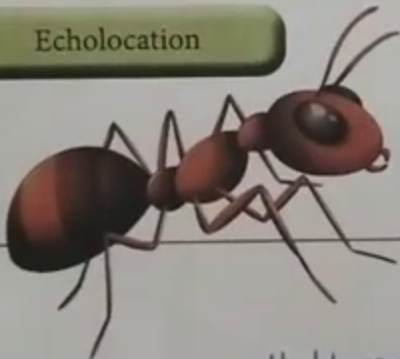

Knowing smell through antennae

Good sense of smell

Feeling vibrations through legs

Good sense of hearing

Echolocation

Knowing smell through

Producing ultrasonic sound.

Knowing smell through  
1... antennae.....

Feeling vibrations  
2... through legs.....

3... Good sense of smell.

1... Producing ultrasonic sound.

2... Echolocation.....

3... Good sense of hearing.

1. Hearing small things

2. Hearing vibrations

3. Hearing sounds of small

1. Hearing vibrations, small

2. Hearing vibrations

3. Hearing sounds of small

Q. 8. Write the animals which are active during night alone.

1. Cat

2. Bat

3. Owl

4. Fox

5. Wolf

6. Jackal

7. Crow

8. Raven

3. Good sense of smell.

3. Good sense of hearing.

2.8

Write the animals which are active during night alone.

Cat

Rat

Squirrel

Bat

Goat

Cow

Owl

Deer

Cat

Rat

Owl

Bat

and hurt her right foot and was not able to run. Geetha cried because she could not win. Her Physical Education teacher gave her first aid and comforted her by saying, 'Don't worry, you can participate next time and win'. Geetha appreciated her friends who won the prize. She returned home with the confidence that she would participate the next time and win.

1. Why did Geetha cry?

Geetha cried because she could  
not win.

2. How did Geetha's mother take care of her?

Geetha cried because she could  
not win.

2. How did Geetha's mother take care of her?

She take care of her by providing  
energy rich foods.

3. List out the qualities mentioned in the paragraph that will help to live successfully in the society.

The paragraph highlights qualities like

She take care of her by providing  
energy rich foods.

3. List out the qualities mentioned in the paragraph that will help to live successfully in the society.

The paragraph highlights qualities like  
Resilience, Sportsmanship, Confidence.

4. Write the energy rich foods mentioned in the paragraph.

The energy rich foods mentioned are  
eggs milk and fruits

successfully in the society.

The paragraph highlights qualities like  
Resilience, Sportsmanship, Confidence.

4. Write the energy rich foods mentioned in the paragraph.

The energy rich foods mentioned are  
eggs, milk and fruits.

c) Saving energy

☒ d) Protection

2. Kannan saw the birds flying in V shape in the evening, when he was playing. Why do they fly like that?

a) To share work

b) To get food easily

☒ c) To save energy

d) To look beautiful

3. To whose command do all the elephants in a group obey?

a) Male elephant

b) Elder elephant

c) Younger elephant

☒ d) Female elephant

4. Why do dogs pant during summer?

☒ a) To reduce the heat of the body

b) It feels thirsty

c) To increase the heat of the body

d) It feels hungry

**Choose the correct answer and shade it.**

1. What is the advantage of small fish looking big when they move from one place to another as a group?
  - a) Getting food
  - b) Sharing of work
  - c) Saving energy
  - ☒ d) Protection
  
2. Kannan saw the birds flying in V shape in the evening, when he was playing. Why do they fly like that?
  - a) To share work
  - b) To get food easily
  - ☒ c) To save energy
  - d) To look beautiful
  
3. To whose command do all the elephants in a group obey?
  - a) Male elephant
  - b) Elder elephant

a) Getting food

b) Sharing of work

c) Saving energy

☒ d) Protection

2. Kannan saw the birds flying in V shape in the evening, when he was playing. Why do they fly like that?

a) To share work

b) To get food easily

☒ c) To save energy

d) To look beautiful

3. To whose command do all the elephants in a group obey?

a) Male elephant

b) Elder elephant

c) Younger elephant

☒ d) Female elephant

4. Why do dogs pant during summer?

☒ a) To reduce the heat of the body

b) It feels thirsty

c) To increase the heat of the body

a) To share work

b) To get food easily

☒ c) To save energy

d) To look beautiful

3. To whose command do all the elephants in a group obey?

a) Male elephant

b) Elder elephant

c) Younger elephant

☒ d) Female elephant

4. Why do dogs pant during summer?

☒ a) To reduce the heat of the body

b) It feels thirsty

c) To increase the heat of the body

d) It feels hungry

5. Varun went to a zoo. He took some time to spot the zebra standing in the middle of the bush. What is the reason for that?

Statement: 1 There were stripes on the body of zebra.

- Broad feet
- c) Elephant - Trunk
- d) Tiger - Ear ✓

7. Chandra saw ants in the sugar container in her house. How did the ants find the place where the sugar was kept?

- a) With the help of antennae ✓
- b) Through good eyesight
- c) By feeling vibration
- d) Through good sense of hearing

8. Which animal finds the object in its path by echolocation?

- a) Moth
- b) Bat ✓
- c) Cat
- d) Owl

9. Which animal carries its young one in a pouch?

- a) Lion
- b) Elephant

d) Tiger - Ear ✓

7. Chandra saw ants in the sugar container in her house. How did the ants find the place where the sugar was kept?

a) With the help of antennae ✓

b) Through good eyesight

c) By feeling vibration

d) Through good sense of hearing

8. Which animal finds the object in its path by echolocation?

a) Moth

b) Bat ✓

c) Cat

d) Owl

9. Which animal carries its young one in a pouch?

a) Lion

b) Elephant

c) Kangaroo ✓

d) Bear

10. Which of the following takes care of its young ones?

7. Chandra saw ants in the sugar container in her house. How did the ants find the place where the sugar was kept?

- a) With the help of antennae ✓
- b) Through good eyesight
- c) By feeling vibration
- d) Through good sense of hearing

8. Which animal finds the object in its path by echolocation?

- a) Moth
- b) Bat ✓
- c) Cat
- d) Owl

9. Which animal carries its young one in a pouch?

- a) Lion
- b) Elephant
- c) Kangaroo ✓
- d) Bear

10. Which of the following takes care of its young ones?

- a) Human beings
- b) Kangaroo

- c) By feeling vibration  
d) Through good sense of hearing
8. Which animal finds the object in its path by echolocation?  
a) Moth  
b) Bat ✓  
c) Cat  
d) Owl
9. Which animal carries its young one in a pouch?  
a) Lion  
b) Elephant  
c) Kangaroo ✓  
d) Bear
10. Which of the following takes care of its young ones?  
a) Human beings  
b) Kangaroo  
c) Cow  
d) All of the above ✓

**I CAN DO - 2**

## MONTHLY TEST (February)

Class - 4

SCIENCE

Time : 45 Minutes

Name: \_\_\_\_\_

Marks : 15

**Read the story given below and answer all the questions.**

A mother elephant plucked a leaf with its trunk and gave it to its young one, and said, 'You should not go anywhere. Stay here.' But the young one followed the butterflies and left the group.

After going a long way, the young one started searching for its

Suddenly the little elephant heard a roar. The little elephant was scared because there came a tiger to attack it. At that time the family of the little elephant came there and saved it. The older elephant of the family said, 'You should not go alone anywhere.' The little elephant nodded its head and went with its herd alongside its mother happily.

### Questions

1. Which organ helps the fish to swim in water?

Fins help the fishes to swim in water.

2. Write the animals mentioned in the story that have stripes on their body.

scared because there came a tiger to attack it. At that time the family of the little elephant came there and saved it. The older elephant of the family said, 'You should not go alone anywhere.' The little elephant nodded its head and went with its herd alongside its mother happily.

### Questions

1. Which organ helps the fish to swim in water?

Fins help the fishes to swim in water.

2. Write the animals mentioned in the story that have stripes on their body.

Giraffe, tiger and zebra.

Fins help the fishes to swim in water.

2. Write the animals mentioned in the story that have stripes on their body.

Giraffe, tiger and zebra.

3. Why do birds fly in 'V' shape?

Birds fly in 'V' shape to conserve energy.

4. What is the special feature found in the body of giraffe? How is it useful to it?

Long neck is the special feature in giraffe.

2. Write the animals mentioned in the story that have stripes on their body.

Giraffe, tiger and zebra.

3. Why do birds fly in 'V' shape?

Birds fly in 'V' shape to conserve energy.

4. What is the special feature found in the body of giraffe? How is it useful to it?

Long neck is the special feature in giraffe.  
It is used to eat leaves from tall trees.

3. Why do birds fly in 'V' shape?

Birds fly in 'V' shape to conserve energy.

4. What is the special feature found in the body of giraffe? How is it useful to it?

Long neck is the special feature in giraffe.  
It is used to eat leaves from tall trees.

5. Which animals were found in group in the story?

Elephant, fish and crane were found in group in the story.

3. Why do birds fly in 'V' shape?

Birds fly in 'V' shape to conserve energy.

4. What is the special feature found in the body of giraffe? How is it useful to it?

Long neck is the special feature in giraffe.  
It is used to eat leaves from tall trees.

5. Which animals were found in group in the story?

Elephant, fish and crane were found in group in the story.
